

Towards a university Enterprise alliance in Jordan

TEJ Project

The TEJ project is aimed to contribute to stimulate the economic growth in Jordan by building strong and sustainable partnerships between Universities and Business, promoting good practice for implementing university enterprises link offices in 9 Jordanian Universities and enhancing human skills.

More specifically, the TEJ project will lead to:

- The creation Jordanian University-Enterprise Network as functional resource and networking platform fostering the exchange of knowledge information and opportunities between universities and enterprises in Jordan;
- The establishment of institutional structures in form of an interface , which is in charge of establishing and managing university-enterprises linkages and building lasting relationships with the business world;
- Development of skills, capacities and attitudes of Jordanian universities staff towards higher employability of Jordanian Graduates and Increased innovation and technology transfer;
- Reform and modernization of the institutional strategies, managerial and organizational capacities of 9 Jordanian Universities, thus enhancing the competitiveness; financial autonomy and sustainability of universities
