President's message

Sustainability refers to the ability to implement practical measures to meet our needs without compromising the availability of required resources for future generations to meet their needs. This is achieved through the implementation of economic, environmental, and social policies, as well as conducting scientific research that contributes to the preservation of these resources. The University of Petra recognizes that the future

necessitates enhancing efforts to transform the university environment into a model to be emulated in sustainability and the preservation of natural resources, thereby deepening this concept in the minds of students and presenting a distinctive model for the country and the world. In this context, the university has worked to adopt and develop initiatives that aim to transform the university campus into a green campus. The university is committed to reducing its carbon footprint, utilizing clean energy and energy efficiency protocols, increasing water efficiency and implement water reuse programs, investing in transportation efficiency improvements, investing in sustainable environment and infrastructure, reducing waste, properly handling waste materials, and encouraging sustainable environmental practices among all members of the university community to achieve sustainable development goals. The University of Petra believes that these efforts not only serve the university but also contribute to supporting a national and global vision to achieve a more sustainable future. The university aspires to be at the forefront of universities that play an active role in confronting environmental challenges and will move forward towards achieving its vision of providing a green and sustainable campus that is influential in the path of higher education and the environment alike.

Prof. Dr. Rami Abdel Rahim
President of the University

introduction

At University of Petra, sustainability is not merely a goal but a fundamental principle that drives our actions and decisions since its inception. The primary objective of UOP is to establish itself as a model green campus. Our approach is grounded in a deep sense of responsibility to address pressing environmental challenges while advancing the United Nations Sustainable Development Goals (SDGs) through integrating interdisciplinary research, education, and administrative practices. Our environmental management plan is rigorously monitored, assessed, and periodically updated to ensure ongoing efficacy.

UOP offers a distinctive research and educational environment, with a pronounced focus on projects that address sustainability and contemporary environmental issues. Our research encompasses key areas such as water management, clean energy, energy efficiency, and waste management. The UOP sustainability strategy positions the university at the forefront of environmental stewardship and policy implementation.

In 2023, our commitment to sustainability remains unwavering as we continue to navigate a rapidly evolving global landscape. This year, we have made substantial strides in integrating sustainability into every facet of our university—ranging from groundbreaking research and innovative teaching to operational practices and community engagement. In the following pages, detailed accounts of the initiatives, milestones, and contributions related to each of the 17 Sustainable Development Goals (SDGs) will be presented. As we present this report, we reflect on our achievements, acknowledge our challenges, and reaffirm our dedication to creating a more sustainable future through knowledge, collaboration, and actions.

SDG 01

The university of Petra is committed to the realization of Sustainable Development Goal (SDG) 1, which is to eliminate poverty in every dimension. We are making progress towards the establishment of a more equitable society by employing a multifaceted approach that encompasses impactful community collaborations, innovative educational strategies, and targeted financial support.

Our endeavours to combat poverty are predicated on the removal of economic obstacles. We have implemented a variety of financial support mechanisms, such as flexible payment plans, emergency assistance funds, and comprehensive scholarship programs. These resources are specifically designed to assist students in overcoming financial obstacles and focus on their personal and academic growth.

Our approach to poverty alleviation is predicated on the enhancement of education accessibility. Academic advising, career readiness programs, and personalized instruction comprise our support services. At UOP we guarantee that each student has the chance to prosper and enhance their economic prospects by eliminating educational barriers and providing supplementary resources.

We demonstrate our dedication to SDG 1 by actively participating in the community, which extends beyond the confines of our campus. We collaborate with local organizations to provide programs that address critical requirements, including financial literacy and reasonably priced job training. These initiatives are intended to foster enduring positive change and assist the broader community in overcoming poverty-related obstacles.

SDG 02

The University of Petra is dedicated to promoting Sustainable Development Goal (SDG) 2, which aims to eradicate hunger and foster sustainable food systems. We are actively engaged in implementing extensive strategies, inventive projects, and collaborative alliances to improve the availability and accessibility of food while promoting environmentally friendly farming methods.

In order to address the issue of food insecurity, our university has created a number of essential programs designed to assist students who are experiencing financial difficulties and lack access to sufficient food. This involves forming alliances with local organizations to offer nourishing food choices. These endeavors guarantee that individuals who require it can obtain nutritious nourishment.

The dedication to promoting sustainable agriculture is evident in our campus and research endeavors. In addition, our research programs investigate novel strategies to enhance agricultural sustainability, thereby contributing to wider initiatives aimed at guaranteeing food security.

Our approach to SDG 2 places great emphasis on education and communication. Our organization actively interacts with local communities by conducting educational workshops, establishing alliances with food security organizations, and implementing public awareness campaigns. The primary objectives of these activities are to disseminate information regarding sustainable food practices, promote community engagement, and cultivate a more profound comprehension of the issues and remedies associated with hunger and food security.

SDG 03

The University of Petra is committed to promoting Sustainable Development Goal (SDG) 3, which seeks to guarantee the health and well-being of all individuals. By implementing preventive health measures, comprehensive wellness programs, and engaging with the community, our goal is to create a healthier campus and have a beneficial influence on the overall health of the community.

In order to foster physical and mental wellness, the University of Phoenix provides an extensive array of healthcare services to assist both students and staff members. This encompasses the availability of on-campus health clinics, nutrition clinic, mental health counselling, and preventive care initiatives. Through the provision of these services, our objective is to cater to the physical and mental health requirements of individuals and guarantee that every member of our community receives the necessary assistance to flourish.

At UOP we are dedicated to promoting health not only via medical services but also through wellness and prevention programs. Our organization provides exercise classes, nutrition workshops, and stress management seminars that aim to promote healthy living choices. These programs are integral to our comprehensive approach aimed at fostering general well-being and preemptively addressing health concerns.

Our university actively collaborates with the local community to improve public health and well-being. We engage in partnerships with local health organizations to implement outreach initiatives, health fairs, and educational campaigns that specifically target significant health issues. These projects have a positive impact on both our local community and the broader region by enhancing health outcomes and increasing access to healthcare services.

SDG 04

The University of Petra is committed to promoting Sustainable Development Goal (SDG) 4, which seeks to ensure universal access to inclusive and equitable quality education. Our commitment lies in creating an educational atmosphere that promotes lifelong learning and personal growth by utilizing innovative teaching methods, offering different learning opportunities, and actively engaging with the community. In order to ensure fair and equal access to education, our university has created a variety of programs specifically tailored to assist students from varied backgrounds. This includes various chances for scholarships, specialized academic support services, and programs aimed at improving accessibility for students with impairments. These endeavors are focused on guaranteeing that every student has the chance to excel and derive advantages from our educational offerings.

Our approach to outstanding education priorities emphasizes the significance of varied and cutting-edge learning experiences. Our institution provides a diverse range of programs, encompassing experiential learning opportunities, multidisciplinary courses, and digital learning platforms. These projects aim to improve students' educational experiences and provide them with the necessary skills to succeed in a fast-evolving environment.

Our educational philosophy places great emphasis on promoting lifelong learning. We provide continuing education programs, professional development workshops for staff members and students, and community courses that expand learning options outside conventional degree programs. Through active involvement with the local community and the provision of easily accessible educational materials, we facilitate continuous personal and professional development for individuals at every stage of their lives.

SDG 05

The University of Petra is dedicated to promoting Sustainable Development Goal (SDG) 5, which aims to attain gender equality and empower women and girls. We are striving to establish a fair and inclusive atmosphere on campus that promotes gender equality in all aspects of school life, through extensive policies, specific initiatives, and proactive advocacy. In order to promote gender equality, our university has adopted a variety of policies with the goal of fostering fairness and eradicating discrimination. This includes the creation of an office dedicated to promoting equality and sustainability, the implementation of fair hiring processes, the development of courses that take into account gender sensitivity, and the installation of strong policies to combat harassment. These steps guarantee that every member of our university community is treated with dignity and has an equitable opportunity to thrive.

Our university provides a range of programs aimed at empowering women and promoting gender equality. This encompasses programs aimed at developing leadership skills and providing resources to tackle difficulties specific to gender. Through the provision of these chances, our objective is to cultivate self-assurance, facilitate professional growth, and advocate for equal representation of genders in leadership positions.

Our efforts to promote gender equality go beyond our campus through proactive advocacy and community engagement. We engage in partnerships with local organizations to promote gender equality projects, organize awareness campaigns, and actively contribute to international dialogues on women's rights. These endeavors contribute to the promotion of gender equality in the wider community and contribute to the global advancement of Sustainable Development Goal 5.

SDG 06

The University of Petra is dedicated to promoting the achievement of Sustainable Development Goal (SDG) 6, which specifically aims to provide sustainable governance and accessibility of water and sanitation for all individuals. We are making significant advancements in improving water conservation, upgrading sanitation infrastructure, and raising community awareness through the adoption of innovative solutions, implementation of strategic initiatives, and engagement in educational outreach.

Our university has implemented several water conservation measures throughout the campus in response to the problem of water scarcity. We have implemented water-conserving fixtures, such as low-flow faucets and toilets, and developed a comprehensive rainwater collection system. These actions have significantly decreased our water consumption and shown our commitment to prudent water management methods.

The University of Petra has made significant investments in enhancing our sanitation infrastructure to maintain exemplary levels of cleanliness and operational effectiveness. This modernization involves the installation of sophisticated wastewater treatment equipment and the establishment of regular maintenance procedures to guarantee optimal performance. These improvements not only promote the health and well-being of our campus community but also serve as a prime example of the most effective methods for managing sanitation.

We prioritize education and community engagement in our efforts to achieve SDG 6. We organize educational sessions and conferences centered around the topics of water preservation, sanitation methods, and the importance of sustainable water administration. Through active involvement of students, staff, and local communities, our goal is to enhance consciousness and foster a sense of duty towards water and sanitation resources.

SDG 07

The University of Petra is actively involved in the pursuit of Sustainable Development Goal (SDG) 7, which seeks to guarantee universal access to affordable, dependable, sustainable, and modern energy. By using inventive methods, strategic programs, and educational campaigns, we are making substantial advancements in converting our campus and community into exemplars of energy efficiency and sustainability.

UOP has made substantial progress in advocating for the use of renewable energy on its campus. We have successfully implemented solar panels on multiple structures, resulting in an excess of electricity production above our consumption requirements. Furthermore, this program not only helps to decrease carbon emissions but also provides a tangible example of sustainable energy solutions for our students and the community.

Furthermore, UOP has established extensive energy efficiency projects. These measures encompass the installation of LED technology for our lighting systems, improving insulation in campus buildings, and allocating funds towards smart thermostats. UOP is facilitating collaboration among researchers, students, and industry specialists. We are actively participating in the advancement of innovative solutions aimed at tackling worldwide energy concerns.

The University of Phoenix (UOP) is actively involved in educating and empowering both its students and the wider community regarding renewable energy. We enhance public knowledge of energy saving and sustainability measures by conducting workshops, seminars, and collaborating with local organizations. Our outreach endeavors strive to motivate upcoming visionaries and trailblazers to propel advancement towards a more environmentally friendly energy future.

SDG 08

The University of Petra is dedicated to the advancement of Sustainable Development Goal (SDG) 8, which is designed to foster inclusive and sustainable economic growth, productive employment, and acceptable work opportunities. We are striving to improve the career prospects of all community members and promote economic development through strategic initiatives, innovative programs, and partnerships.

Our university's mission is to foster economic growth and innovation. We have implemented a variety of initiatives to encourage entrepreneurship, including innovation laboratories and business incubators. These initiatives offer students and researchers the resources and support necessary to transform innovative concepts into viable business ventures, thereby contributing to the economic development of the local and regional areas

Our primary focus is to establish routes to employment in order to encourage meaningful and effective work. Our range of career services encompasses job placement assistance, internships, and professional development programs. Our organization facilitates the connection between students and potential companies, while also offering advice on career planning. This ensures that graduates are adequately equipped to enter the industry and pursue fulfilling jobs.

Our university engages in active collaboration with industry leaders and organizations to effectively bridge the gap between education and the employment market. These collaborations enable practical research, offer students practical experience, and generate possibilities for workforce training. By engaging in these partnerships, we actively contribute to the expansion of the economy while also ensuring that our students develop the necessary abilities to meet the requirements of a rapidly changing employment landscape.

SDG 09

The university is committed to promoting Sustainable Development Goal (SDG) 9, which focuses on the significance of building robust infrastructure, promoting sustainable industrialization, and stimulating innovation. We are dedicated to improving infrastructure and fostering technological progress through focused projects, innovative research, and strategic partnerships.

Our university's plan places great importance on investing in infrastructure that is resilient. We have made substantial improvements to our campus buildings, incorporating cutting-edge technologies and environmentally friendly construction methods. These enhancements not only increase the operation and durability of our infrastructure, but also act as exemplars of sustainability and resilience.

The dedication to promoting sustainable industrialization is evident in our research and academic programs. Our institution provides specialized training and research opportunities that specifically concentrate on sustainable practices and green technologies. Through collaborations with prominent industry leaders, we assist projects aimed at investigating and advocating for sustainable industrial processes, thereby making significant contributions to overarching environmental and economic objectives.

Promoting innovation is a core aspect of our goal. We engage in active collaboration with businesses, academic institutes, and technology developers to propel progress and generate innovative solutions. Our innovation laboratories and entrepreneurship programs equip students and researchers with the necessary resources and assistance to create and execute revolutionary concepts, ultimately fostering technical advancement and economic growth.

SDG 10

The University of Petra is committed to promoting Sustainable Development Goal (SDG) 10, which specifically targets the reduction of inequalities within and across countries. Through advocating for inclusive practices, facilitating fair access, and establishing global connections, we are actively addressing gaps and fostering a more just and equitable environment.

To tackle inequality on campus, it is essential to cultivate a culture that promotes inclusivity. We have implemented a range of programs to assist marginalized communities. These initiatives are intended to guarantee that every student has the chance to flourish, irrespective of their background.

Addressing educational inequality entails enhancing the accessibility of higher education. Our institution is dedicated to offering financial assistance, adaptable payment choices, scholarships, and specialized support services to students who come from economically challenged households. The objective of these efforts is to eliminate obstacles to education and establish prospects for every individual to achieve academic success.

In order to tackle global disparities, our university actively participates in international alliances and cooperative initiatives. Through collaboration with global organizations, we engage in activities aimed at tackling inequality on a broader level and making a meaningful contribution to international development objectives. These collaborations enable us to utilize resources, exchange information, and contribute to international endeavors aimed at reducing inequalities.

SDG 11

The University of Petra is dedicated to promoting Sustainable Development Goal (SDG) 11, which seeks to cultivate inclusive, secure, resilient, and sustainable urban settings. By implementing strategic initiatives, pioneering projects, and actively engaging with the community, we are actively contributing to the development of a sustainable campus infrastructure while fostering a culture of resilience and inclusivity. As part of our actions to improve campus sustainability, we have made a commitment to implement environmentally friendly construction methods and improve our infrastructure. We have incorporated energy-efficient technology, employed sustainable materials, and integrated eco-friendly landscaping over the entire campus. These programs aim to reduce our impact on the environment and provide a healthier and more pleasant environment for students and staff.

Our university places a high importance on improving the ability to recover quickly and ensuring safety inside our campus. We have implemented comprehensive emergency preparedness measures, strengthened our facilities to comply with seismic safety laws, and implemented advanced security systems. These steps are essential for ensuring a safe and strong environment for all members of our academic community.

Promoting inclusivity and encouraging active participation from the community are key elements of our approach to accomplishing Sustainable Development Goal 11. We actively interact with local communities through outreach campaigns, strategic collaborations, and collaborative projects aimed at addressing urban concerns. Through the promotion of open conversation and cooperative endeavours, we are actively contributing to the advancement of more unified and resilient communities, both inside and outside our campus.

SDG 12

The University of Petra is committed to furthering Sustainable Development Goal (SDG) 12, which centers on the promotion of responsible practices in consumption and production. We are making significant advancements in optimizing resource utilization, waste reduction, and fostering a sustainable attitude across our institution by adopting innovative techniques, implementing strategic reforms, and launching extensive educational activities.

As per the objectives of Sustainable Development Goal 12, we have implemented cutting-edge waste management techniques throughout our campus. Our strategy encompasses a recycling program, stringent waste sorting systems, and measures focused on minimizing the use of disposable goods. These measures greatly reduce trash generation and foster an environment where sustainable activities are highly valued.

The evidence of our dedication to resource efficiency is apparent in the modifications we have made throughout our whole campus. We have implemented cutting-edge energy-saving solutions, implemented water conservation techniques, and revised our procurement strategies to prioritize sustainable options. These improvements not only help to decrease the negative effects on the environment but also provide a standard for effective utilization of resources.

Our strategy for achieving SDG 12 relies heavily on educational outreach, which is of utmost importance. Our organization offers a variety of programs and seminars designed to educate our community about the fundamental concepts of sustainable consumption and production. By means of these endeavors, we include students, professors, and local inhabitants in activities that promote a more sustainable way of living and community.

SDG 13

The primary objective of the University of Petra is to promote the advancement of Sustainable Development Goal (SDG) 13, which specifically addresses the issue of climate change and its associated impacts. By conducting innovative research, implementing impactful campus initiatives, and actively engaging with the community, we are working towards minimizing our environmental footprint and enhancing our ability to adapt to climate change.

As part of our attempts to address climate change, we have implemented various measures with the goal of reducing our carbon emissions. These measures encompass transitioning to sustainable energy sources such as solar power, improving energy efficiency in campus facilities, optimizing material usage, implementing effective waste management and reduction strategies, establishing a recycling program, and promoting the use of mass transportation. Implementing these strategies is crucial for reducing our greenhouse gas emissions and promoting a more environmentally friendly campus.

Our university is at the forefront of climate research and technology innovation. We are extensively engaged in the examination of climate dynamics, the formulation of sustainable solutions, and the investigation of climate adaptation techniques. By forming alliances with industry leaders and academic collaborators, we are making significant contributions to the worldwide effort to combat climate change by providing essential insights and improvements.

Our climate plan places great importance on education and community engagement. Our organization provides a diverse range of initiatives, such as lectures, workshops, and public campaigns, aimed at enhancing understanding of climate change and advocating for sustainable practices. Our goal is to motivate collective action and promote a more resilient and sustainable future by engaging students, teachers, and local communities.

SDG 14

The university is dedicated to promoting Sustainable Development Goal (SDG) 14, which focusses on the imperative to safeguard and responsibly oversee our oceans, seas, water bodies, and marine resources. By doing thorough research, implementing educational programs, and actively involving the community, our goal is to improve marine conservation efforts and encourage the adoption of sustainable practices.

We perform state-of-the-art research on biodiversity and the effects of climate change that directly influence all ecosystems. Our research activities strive to offer important knowledge and formulate tactics for the preservation and responsible utilization of marine resources.

Education is essential in our initiatives to promote sustainability. We provide specialized courses and programs that concentrate on environmental stewardship and the preservation of natural resources. By providing students with information and skills pertaining to ecosystems, we cultivate a cohort of dedicated leaders committed to safeguarding our water bodies.

We are dedicated to preserving water bodies through community engagement and international partnerships. We collaborate with local organizations, government agencies, and international groups to tackle maritime environmental challenges and advocate for sustainable practices. Our organization utilizes outreach initiatives, public awareness campaigns, and collaborative projects to increase knowledge and encourage joint efforts to protect the health of our seas.

SDG 15

The University of Petra is committed to promoting Sustainable Development Goal (SDG) 15, which focusses on the urgent requirement for sustainable land management, forest preservation, and protection of biodiversity. We are dedicated to conserving natural ecosystems and advocating for sustainable practices through innovative research, environmental stewardship programs, and collaborative initiatives.

Our primary goal in promoting SDG 15 is conducting environmental research. We conduct comprehensive research on ecology, land degradation, urbanization, and biodiversity conservation. The objective of our research initiatives is to create novel strategies for effectively and responsibly managing natural resources, while also tackling issues such as deforestation and the loss of habitats.

Our university is actively engaged in developing sustainability projects aimed at safeguarding and rejuvenating natural areas. This encompasses comprehensive initiatives across the entire campus aimed at restoring forests, preserving soil, and upkeeping green areas. By incorporating these methods into our activities, we actively support the conservation of nearby ecosystems and the advancement of environmental sustainability.

Cooperation is essential to our strategy for achieving Sustainable Development Goal 15. Our organization collaborates with environmental organizations, government agencies, and global partners to address the challenges associated with land degradation and the loss of biodiversity. Our goal is to strengthen collaborative efforts in protecting ecosystems and promoting sustainable land management through joint initiatives, conservation campaigns, and educational outreach.

SDG 16

The University of Petra is dedicated to promoting Sustainable Development Goal (SDG) 16, which seeks to cultivate peaceful and inclusive societies while ensuring justice and robust institutions. We are committed to fostering openness, accountability, and social justice inside and outside our campus by implementing new programs, engaging with the community, and conducting research efforts.

Our approach to SDG 16 is centered around establishing a campus atmosphere that is both harmonious and inclusive. We have enacted policies and initiatives that foster open communication, peaceful resolution of conflicts, and equitable opportunity for every member of the UOP community. Efforts such as diversity training, student mediation services, and inclusive campus events are implemented with the aim of cultivating a friendly and fair environment.

We demonstrate our dedication to fairness by striving to enhance the availability of legal resources and representation. We provide counselling clinics and educational programs focused on legal rights and duties. The purpose of these materials is to provide students and community members with the necessary knowledge and assistance to effectively handle legal difficulties and advocate for their rights.

Enhancing the efficiency and responsibility of our institution is a major objective of our university's purpose. We have implemented transparent governance processes, ethical standards, and accountability measures. Through cultivating an atmosphere characterized by honesty and transparency, we strive to guarantee the efficient and equitable functioning of our organization, thereby serving as a model for responsible and efficient administration.

SDG 17

The University of Petra is entirely devoted to promoting Sustainable Development Goal (SDG) 17, which highlights the significance of partnerships and cooperative accomplishments in attaining sustainable development. By forming strategic partnerships, pooling resources, and actively participating in global initiatives, we are committed to increasing our influence and making meaningful contributions towards wider sustainable development goals.

Our approach to promoting SDG 17 involves establishing strategic alliances with diverse stakeholders as a key strategy. We engage in partnerships with academic institutions, governmental agencies, non-governmental organizations, and industry leaders to tackle intricate global issues. These collaborations allow us to use resources, exchange information, and execute cooperative projects that promote sustainable development objectives.

Our university actively seeks to procure resources and money to bolster sustainable development programs. We actively participate in the process of seeking grants and creating endowments to fund research and community projects. By obtaining a variety of financing sources, we guarantee that our efforts receive ample backing and have the ability to create a significant influence. Our approach to SDG 17 is focused on actively participating and exchanging knowledge on a global scale.

We engage in international conferences, collaborative research projects, and worldwide forums to facilitate the exchange of ideas and the sharing of best practices. By actively participating in and gaining knowledge from the worldwide community, we improve our comprehension of sustainable development obstacles and possibilities, and reinforce our position in the collaborative endeavor to accomplish these objectives.
