

Chemistry and Environment Club

Vision:

Chemistry and Environment Club at the University of Petra is an incubator of excellence for department's students.

Mission:

Carrying out scientific, environmental, cultural and social activities that make the chemistry department environmentally attractive.

Objectives:

The Chemistry and Environment Club promotes the aims and objectives of the University of Petra. Our objectives are:

1. Encourage scientific, environmental, cultural and social activities in the chemistry department.
2. Supporting professional and geographical communities in chemistry-related activities with a commitment to active and ethical involvement.
3. Supporting the public activities of the department and the university
4. Raise awareness the importance of the environment conversation.
5. Developing talents and hobbies of department's students.
6. Boost the communications between the students and the department's staff.
