

Table 3.26	Effect of changing the pH +0.2 on the detection parameters.	56
Table 3.27	Effect of changing the pH -0.2 on the detection parameters in plasma	58
Table 3.28	Effect of changing the pH +0.2 on the detection parameters in plasma	58
Table 3.29	Effect of acid on the detection parameters of amlodipine, atorvastatin, and glimepiride	58
Table 3.30	Effect of base on the detection parameters of amlodipine, atorvastatin, and glimepiride	59
Table 3.31	Effect of setting the temperature +3 °C on the detection parameters	60
Table 3.32	Effect of setting the temperature -3 °C on the detection parameters	60
Table 3.33	Effect of setting the temperature +3 °C on the detection parameters in plasma	62
Table 3.34	Effect of setting the temperature -3 °C on the detection parameters in plasma	62
Table 3.35	Effect of 5% increase of ACN in the mobile phase on the detection parameters	63
Table 3.36	Effect of 5% decrease of ACN in the mobile phase on the detection parameters	64
Table 3.37	Effect of 5% increase of ACN in the mobile phase on the detection parameters in plasma	65
Table 3.38	Effect of 5% decrease of ACN in the mobile phase on the detection parameters in plasma	65
