

Figure 17 : Accuracy results level 100

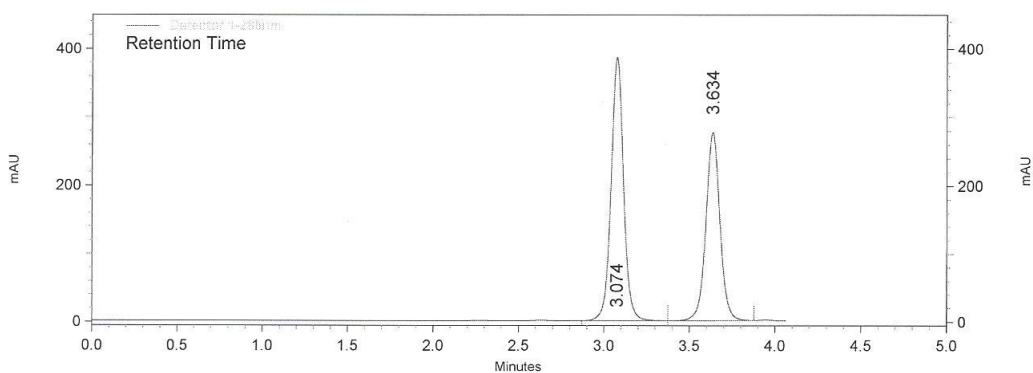

Figure 18 : Accuracy results level 150

Beside the good separation seen from the peaks, the figures (16,17 and 18) shows the relationship in which the changing in concentration levels will change the area of peak (AUC), by increasing the concentration, the AUC will increase.

As have been noted from the above results, both drugs, esomeprazole and tadalafil show a validate accuracy test results .
