Concentration %	Average area	RSD%
50 (57.8mg/L)	661967	1.23
80 (86.48mg/L)	966758	1.21
100 (115.6mg/L)	1299576	1.05
120 (142.72mg/L)	1605229	1.16
150 (173.4mg/L)	1934556	1.13

Table 10 : Results of Linearity of Esomeprazole

 $R^2 = 0.9998$  slope = 11075 Intercept = 17819 LOQ = 10.8 mg/L LOD = 3.6 mg/L

The equation of calibration curve is Absorbance = 11075x + 17819

The calibration curve of peak area versus conc. % for esomeprazole is shown in figure (9).
