

Acknowledgment

I respectfully express my great gratitude for my supervisor Prof. Tawfiq Arafat for the continuous support of my master study and research. I would like to express my deepest gratitude to my co-supervisor Dr. Eyad Mallah, for his charming supervision, advising, and patient encouragement which have been great value for me. It is an honour for me to thank my examination committee Dr Riad Awad, Dr Wael Abu Dayyih for offering all the supportive needs.

Special thanks to Dr.Feras El Hjjj for his brilliant comments for being external examiner at my committee.

It is a pleasure to thank those who made this thesis possible at Yafa Medical Lab; specially Dr Salem Aqel and Huda Lutfi Saleh.

My special thanks for Pharmacist Ashraf and Technician Hamza Al-Hroub, for their friendly and great work.

I owe my loving thanks to my wonderful family, my father Ziad Oumeish, my lovely mother Jackleen, my sweet sisters Aseel, Leen, Elian and my brother Tareq, who gave me all support that I need throughout this course of the thesis.

I would like to thank all my friends who encouraged me during the completion of my project, blessings and valuable support.
