

Acknowledgements

I would like to take this opportunity to thank my major supervisor, Dr. Nidal Qinna for his constant support, encouragement and guidance during the course. I have learnt many valuable things about professional life from him that will help me immensely in my career path.

I am grateful to Dr. Adnan Badwan for his scientific guidance and financial support, without which this project would not have been a success. I also would like to express my sincere appreciation to the family of Jordanian Pharmaceutical Manufacturing Company (JPM) for all the effort and support throughout this study.

Next, I would like to thank my co-worker in University of Petra animal house: Mohammed Al Bayed. He was always willing to lend a helping hand with animal handling techniques. I would also like to thank Mr. Mujtaba Badr for his assistance.

Special thanks to my friends who have supported me over the course of my research especially my friend Hanadi Al-shaker. I am also grateful to my friends in Gaza for their love and affection. Finally, I would like to thank my family members who were always there for me, in person, or in spirit, when I needed them. I am truly blessed to have such a wonderful family.
