29	Shows multiple binding modes demonstrated by AZ4 (blue or pink sticks) in the ATP-binding site of the EGFR kinase domain (gold). The picture was generated by PyMol.9 Electrostatic interactions are shown as yellow dotted lines. Some protein chains are not shown for clarity	52
30	Shows the binding mode of AZ5 (orange) within the COX-1 active site (gray)	54
31	Shows the binding mode AZ5 (orange) within the COX-2 active site (gray), respectively. Yellow dotted lines indicate for hydrogen bonding. The picture was generated by PyMol.11 Some protein chains are not shown for clarity	54
