Structural elements design manual

1. Structural components. Design

I. Title

624.1771

ISBN 0 7506 0313 5

Printed and bound in Great Britain

Contents

<i>Preface</i>	9
1 General matters	1
1.1 Introduction	1
1.2 British Standards	2
1.3 Loading	3
1.4 Structural mechanics	14
1.5 Theory of bending	14
1.6 Compression members	21
1.7 Summary	25
2 Timber elements	26
2.1 Stress grading	26
2.2 Structural design of timber	27
2.3 Symbols	27
2.4 Strength classes	28
2.5 Grade stresses	28
2.6 Design stresses	30
2.7 Dry and wet exposure conditions	31
2.8 Geometrical properties of timber	31
2.9 Duration of load	31
2.10 Load sharing systems	31
2.11 Types of member	33
2.12 Flexural members	34
2.12.1 Bending (including lateral buckling)	34
2.12.2 Deflection	36
2.12.3 Shear	38
2.12.4 Bearing	39
2.12.5 Design summary for timber flexural members	39
2.13 Proprietary timber beams	49
2.14 Compression members: posts	49
2.14.1 Applied compression stress	50
2.14.2 Permissible compression stress	50
2.14.3 Slenderness of posts	50
2.14.4 Slenderness ratio λ	51
2.14.5 Ratio of modulus of elasticity to compression stress	51
2.14.6 Eccentrically loaded posts	52
2.14.7 Design summary for timber posts	52
