Chapter 3

5. Then, we need to set the **SELECT**, **UPDATE**, and **INSERT** methods. For our sample, we will just set the **SELECT** method:

- 6. Then, we select **Finish**. We then add a **GridView** control on the same page and set the data source to our object data source control:

7. Now we run the page, and voila! We see all of the records without using any code in the UI layer!
