## Kitchen Krap

The kitchen is a gadget heaven, and even if you are not about to re-model it any time soon, there are a couple of items that caught our eye, and they could probably bring any kitchen right up to date.

**From top left to bottom right:** **Built-in Coffee System by Miele** not only removes clutter from your counter-top but it also grinds the beans and steams and froths the milk. **The Chin Family Egg & Spoon Holder by Alessi** gives your kitchen some cuteness. **The Boffi Mini Kitchen Boffi** has reintroduced Joe Columbo's original Carrellone mini-kitchen from 1964 in Corian®. This souped-up kitchen island features a two burner stove, a refrigerator, a can opener, storage, and a chopping board – everything except the kitchen sink. And it works on one electrical plug. **Articulating Kitchen Faucet from Kohler** is crafted from stainless steel and light carbon, this new dynamic faucet will hold any pose for you. **The LG HDTV Refrigerator LSC27991** besides chilling your food this refrigerator has an LCD TV, a DVD hook-up, a radio, a slideshow option (to display your favourite photos), a five-day weather forecast, and 100 built-in recipes. **Crevasse Rinsing Sink by Kohler** has a one touch actuator that runs the water and garbage disposal at the same time. **The New Corian® Illumination Series** introduces five new translucent colours for your kitchen designs. **The Salamander broiler** which is now an option in Miele's Combi-sets is often used by professional chefs to melt cheese or caramelize sugar perfectly. **Miele's Combi-sets** which allows you to customize your cook-top surface beyond the standard gas or electric hob with choices like an induction wok, barbeque grill, fryer, scales, and a Tepan Yaki.
