CAFM, a “software platform,” enables corporations to manage their facilities.

they need special training and continuing education. Stanescu, who provides outsourced CAFM consulting to the United Nations, believes that “consultants working in this particular field need first to become fully knowledgeable of the capabilities of the system that they are going to employ. There is no way to interact with clients without mastering the system first. Also there is a need for flexibility and silent acceptance of redundancy on the part of the consultant. That is because the clients rarely have in mind a clear picture of the final product when retaining a consultant.”

Each client has its own set of unique needs. However, there are some common activities that relate to interior design and the use of CAFM as a
