

VERAMAR PROJECT

An Urban Regeneration Master Plan that involves 15 different projects for an important port in Mexico: the Port of Veracruz. The new shape of this 2 miles waterfront will include a cruiser dock, a marina, four shopping malls, an historic district, an aquarium, a beach renewal, a kids museum and a visitor center.

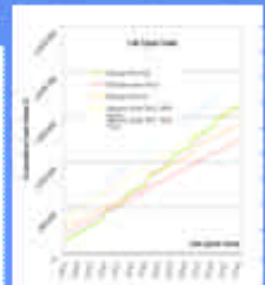

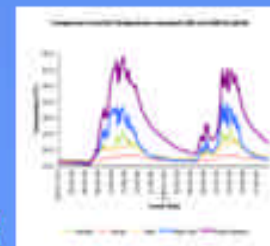

Environmental issues, i.e. the UHI effect

Urban greens and their related benefits (trad. landscaping)

Plants, Climate and Buildings

90 Plants placed on buildings (3D landscaping)

Research and design (R & D)
