

2. Creating Windows Application

5

To create a C# Windows application

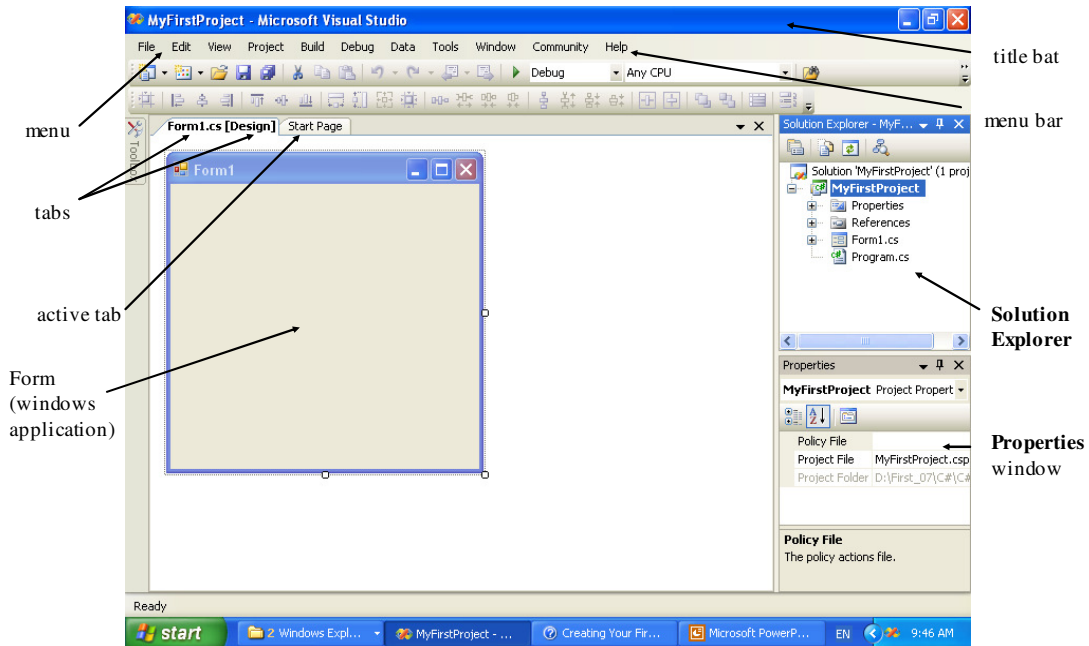

1. On the **File** menu, point to **New**, and then click **Project**.
2. Ensure the **Windows Application** template is selected, in the **Name** field, type **MyProject**, and click **OK**.

7. Double-click the new button to open the Code Editor. Visual C# has inserted a method called `button1_Click` that is executed when the button is clicked.
8. Change the method to look like this:

```
private void button1_Click(object sender, EventArgs e)
{
    label1.Text = "You are welcome in C# windows application";
}
```
