

- variable initialization, 217
 - while, 186, 215–216
- lowercase text, 13, 33
- low-level programming languages, reasons
 - to use, 10
- ls command, 350
- Lvalue errors, math, 314

• M •

- Mac
 - compiler, 361
 - folders, 362
- Mac OS X
 - compiler, 360
 - folders, 362
- machine language, 10
- macros, 303–304
- MADLIB1.C
 - comment styles, 58–59
 - comments and, 56–57
- magic pellets problem, order of
 - precedence, 144–145
- main() function
 - int keyword, 79
 - introduction, 30
 - returning values and, 287–288
- math
 - exponents, 314–315
 - functions, 319–320
 - if command and, 148
 - imaginary number, 319
 - incrementation, 137–139
 - Lvalue errors, 314
 - order of precedence, 314
 - pow() function, 315
 - square root operations, 314, 317–319
- math library, links, 317
- mathematical operators, 86–88
 - + (addition), 87, 134
 - / (division), 87, 134
 - * (multiplication), 87, 134
 - order of precedence, 141–146
 - shortcuts, 212
 - (subtraction), 87, 134
 - values, 134
 - variables, 134
- MATH.H header, pow() function, 315
- MDAS mnemonic, 142–143
- METHUS1.C, 79–80
- METHUS2.C, 83–85
- METHUS3.C, 85–86
- METHUS4.C, 88–90

- METHUS5.C, 90–92
- MiniGW compiler, 360
- mnemonic for order of precedence,
 - 142–143, 335
- modulus (%)
 - introduction, 333
 - math operator, 314
- MSVC (Microsoft Visual C++) compiler, 360
- multiplication symbol (*), 87
- My Dear Mother's Aunt Sally mnemonic,
 - 142–143

• N •

- \n (newline character)
 - printf() escape sequence, 306
