

The ambient lighting in the multifunctional space is produced by a symmetrical arrangement of luminaires in both parts of the room. Downlights equipped with compact fluorescent lamps and pairs of double-focus downlights with halogen lamps are arranged in a uniform pattern. The fluorescent downlights provide efficient lighting for functional events, whereas the dimmable halogendownlights are used for lighting festive occasions and provide lighting for people to take notes during slide or video presentations.

Recessed track with spotlights for presentation lighting or accent lighting.

Recessed downlight with cross baffles for compact fluorescent lamps.

Recessed double-focus downlight for halogen lamps.

Track with spotlights.

The ambient lighting in the multifunctional space is produced by three parallel lines of luminaires that run the length of the room and consist of an alternating arrangement of louvred luminaires equipped with fluorescent lamps and downlights with general service lamps. Wallwashers located along the end walls provide lighting over the wall surfaces. Four downlights are arranged along the walls, combined with two singlets for additional spotlights for accent lighting.

Recessed louvred luminaire for fluorescent lamps.

Recessed downlight for general service lamps.

Recessed wallwasher for general service lamps.

Singlet with spotlight.
