

A regular arrangement of recessed louvred luminaires for the ambient lighting. The lighting is not related to individual workplaces, which means that office layouts can be changed without changing the lighting.

Recessed louvred luminaire for compact fluorescent lamps.

A staggered arrangement of recessed louvred luminaires provides uniform ambient lighting. A linear prismatic lens positioned in the centre of the reflector produces batwing-shaped light distribution, which completely avoids reflected glare, achieves good CRF values throughout the space and allows flexible furniture layout.

Recessed louvred luminaire for fluorescent lamps.
