```
Start Point (NOT STEP)
  The First Step
        mystr = "   o0o wow o0o   "
        mystr = Get Length of String/Variable/Array mystr
        Print Text (NEW LINE) mystr
        WAIT (SECONDS)
```
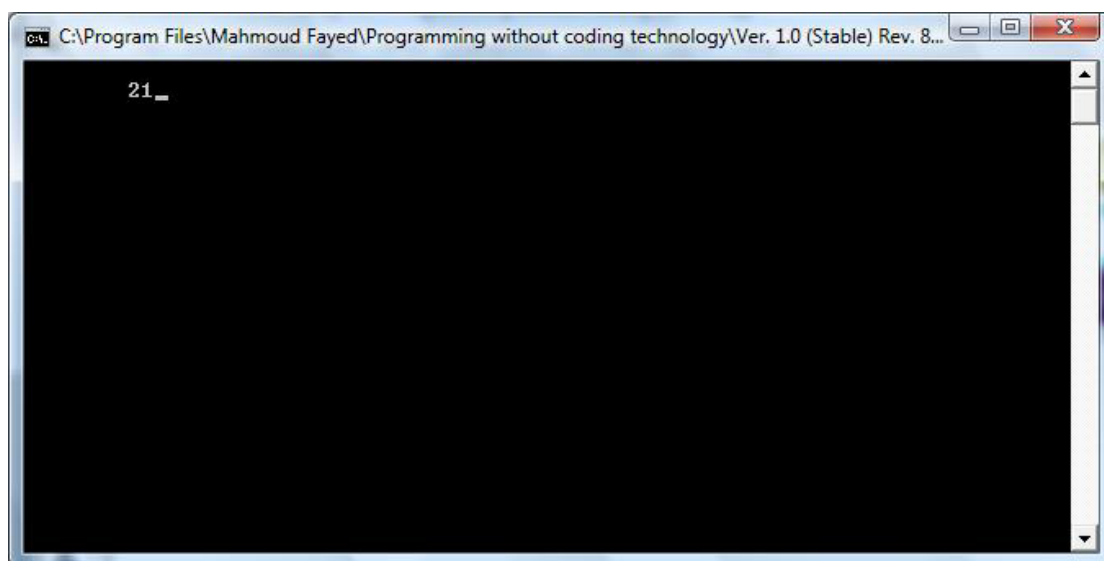

The final steps tree

The final application

# Numerical variables and arithmetic operations

Domain (Arithmetic)

Components:-

- Sum two numbers
- Subtract
- Multiplication
- Division
- Square root
- Numeric value to an integer
- Round
- Modulus (%)
- Generate random number
